Alphabetical Table of Contents of Titles

Adaptation, Niche Conservatism, and Convergence: Comparative Studies of Leaf Evolution in the California Chaparral. David D. Ackerly, 654.
Allee Effects, Immigration, and the Evolution of Species' Niches. Robert D. Holt, Tiffany M. Knight, and Michael Barfield, 253.
The Analysis of Variation of mtDNA Hypervariable Region 1 Suggests That Eastern and Western Pygmies Diverged before the Bantu Expansion. Giovanni Destro-Bisol, Valentina Coia, Ilaria Boschi, Fabio Verginelli, Alessandra Caglià, Vincenzo Pascali, Gabriella Spedini, and Francesc Calafell, 212.

Begging and Sibling Competition: How Should Offspring Respond to Their Rivals? R. A. Johnstone, 388.
Body Size of Insular Carnivores: Little Support for the Island Rule. Shai Meiri, Tamar Dayan, and Daniel Simberloff, 469.
Branching and Self-Organization in Marine Modular Colonial Organisms: A Model. Juan Armando Sánchez, Howard R. Lasker, Erivelton G. Nepomuceno, J. Dario Sánchez, and Michael J. Woldenberg, E24.
Buffering of Life Histories against Environmental Stochasticity: Accounting for a Spurious Correlation between the Variabilities of Vital Rates and Their Contributions to Fitness. William F. Morris and Daniel F. Doak, 579.
Butterfly Selected Lines Explore the Hormonal Basis of Interactions between Life Histories and Morphology. Wilte G. Zijlstra, Marc J. Steigenga, P. Bernhardt Koch, Bas J. Zwaan, and Paul M. Brakefield, E76.

Climate Affects Predator Control of an Herbivore Outbreak. Evan L. Preisser and Donald R. Strong, 754.
Community Ecology: Is It Time to Move On? Daniel Simberloff, 787.
Comparative Studies of Senescence in Natural Populations of Guppies. Michael J. Bryant and David Reznick, 55.
Comparing Alternative Models to Empirical Data: Cognitive Models of Western Scrub-Jay Foraging Behavior. Barney Luttbeg and Tom A. Langen, 263.
Coupled Oscillations in Food Webs: Balancing Competition and Mutualism in Simple Ecological Models. John Vandermeer, 857.

Developmental Stability and Adaptive Variability of Male Genitalia in Sexually Dimorphic Beetles. Kazuo Kawano, 1.
Did Natural Selection or Genetic Drift Produce the Cranial Diversification of Neotropical Monkeys? Gabriel Marroig and James M. Cheverud, 417.
Differences in Visual Signal Design and Detectability between Allopatric Populations of *Anolis* Lizards. Manuel Leal and Leo J. Fleishman, 26.
Disentangling Extrinsic from Intrinsic Factors in Disease Dynamics: A Nonlinear Time Series Approach with an Application to Cholera. Katia Koelle and Mercedes Pascual, 901.
Dynamics of Production of Sexual Forms in Aphids: Theoretical and Experimental Evidence for Adaptive "Coin-Flipping" Plasticity. Fabien Halkett, Richard Harrington, Maurice Hullé, Pavel Kindlmann, Frédéric Menu, Claude Rispe, and Manuel Plantegenest, E112.

The Ecological Genetics of Conditional Strategies. Wade Hazel, Richard Smock, and Curtis M. Lively, 888.
Effects of Body Size and Temperature on Population Growth. Van M. Savage, James F. Gillooly, James H. Brown, Geoffrey B. West, and Eric L. Charnov, 429.
Evolution of Cross-Feeding in Microbial Populations. Thomas Pfeiffer and Sebastian Bonhoeffer, E126.
The Evolution of Jumping Performance in Caribbean *Anolis* Lizards: Solutions to Biomechanical Trade-Offs. Esteban Toro, Anthony Herrel, and Duncan Irschick, 844.
Evolution of Morphological Integration. I. Functional Units Channel Stress-Induced Variation in Shrew Mandibles. Alexander V. Badyaev and Kerry R. Foresman, 868.
The Evolution of Recombination under Domestication: A Test of Two Hypotheses. Jeffrey Ross-Ibarra, 105.
Evolution Restricts the Coexistence of Specialists and Generalists: The Role of Trade-off Structure. Martijn Egas, Ulf Dieckmann, and Maurice W. Sabelis, 518.
The Evolutionary Economics of Immunity. Michiel van Boven and Franz J. Weissing, 277.
Exploring Developmental Modes in a Fossil Arthropod: Growth and Trunk Segmentation of the Trilobite *Aulacopleura konincki*. Giuseppe Fusco, Nigel C. Hughes, Mark Webster, and Alessandro Minelli, 167.
Exploring Rarity Using a General Model for Distribution and Abundance. John Kean and Nigel Barlow, 407.

Foraging by Deep-Diving Birds Is Not Constrained by an Aerobic Diving Limit: A Model of Avian Depth-

Dependent Diving Metabolic Rate. Erpur Snær Hansen and Robert E. Ricklefs, 358.

Frequency and Microenvironmental Pattern of Selection on Plastic Shade-Avoidance Traits in a Natural Population of *Impatiens capensis*. Heidrun Huber, Nolan C. Kane, M. Shane Heschel, Eric J. von Wettberg, Joshua Banta, Anne-Marie Leuck, and Johanna Schmitt, 548.

A General Theory for the Evolutionary Dynamics of Virulence. Troy Day and Stephen R. Proulx, E40.

The Growth/Predation Risk Trade-Off: So What Is the Mechanism? Mark A. McPeek, E88.

Herbivory Promotes Plant Production and Reproduction in Nutrient-Poor Conditions: Effects of Plant Adaptive Phenology. Atsushi Yamauchi and Norio Yamamura, 138.

History and the Species-Area Relationship in Lesser Antillean Birds. Robert E. Ricklefs and Eldredge Bermingham, 227.

How Dispersal Limitation Shapes Species–Body Size Distributions in Local Communities. Rampal S. Etienne and Han Olff, 69.

How Predation Risk Affects the Temporal Dynamics of Avian Leks: Greater Sage Grouse versus Golden Eagles. Adam R. Boyko, Robert M. Gibson, and Jeffrey R. Lucas, 154.

Impact of Supply-Side Ecology on Consumer-Mediated Coexistence: Evidence from a Meta-Analysis. Jonathan W. Moore, Jennifer L. Ruesink, and Kathryn A. McDonald, 480.

The Influence of Space in Genetic-Environmental Relationships When Environmental Heterogeneity and Seed Dispersal Occur at Similar Scale. S. Volis, Y. Anikster, L. Olsvig-Whittaker, and S. Mendlinger, 312.

Life-History Consequences of Investment in Free-Spawned Eggs and Their Accessory Coats. Robert D. Podolsky, 735.

Limits on the Evolution of Tail Ornamentation in Birds. M. R. Evans, 341.

Limits to Trophic Levels and Omnivory in Complex Food Webs: Theory and Data. Richard J. Williams and Neo D. Martinez, 458.

Maternal Dominance, Maternal Condition, and Offspring Sex Ratio in Ungulate Mammals. Ben C. Sheldon and Stuart A. West, 40.

Meta-analysis of Trade-offs among Plant Antiherbivore Defenses: Are Plants Jacks-of-All-Trades, Masters of All? Julia Koricheva, Heli Nykänen, and Ernesto Gianoli, E64.

The Mid-Domain Effect and Species Richness Patterns:What Have We Learned So Far? Robert K. Colwell, Carsten Rahbek, and Nicholas J. Gotelli, E1.

A New Statistical Test of Fitness Set Data from Reciprocal Transplant Experiments Involving Intermediate Phenotypes. R. J. O'Hara Hines, W. G. S. Hines, and B. W. Robinson, 97.

A Novel Cost of *R* Gene Resistance in the Presence of Disease. Tonia Korves and Joy Bergelson, 489.

Of Hummingbirds and Helicopters: Hovering Costs, Competitive Ability, and Foraging Strategies. Douglas L. Altshuler, F. Gary Stiles, and Robert Dudley, 16.

On the Generality of the Latitudinal Diversity Gradient. Helmut Hillebrand, 192.

Optimal Body Size and Energy Expenditure during Winter: Why Are Voles Smaller in Declining Populations? Torbjørn Ergon, John R. Speakman, Michael Scantlebury, Rachel Cavanagh, and Xavier Lambin, 442.

Orientation of the Genetic Variance-Covariance Matrix and the Fitness Surface for Multiple Male Sexually Selected Traits. Mark W. Blows, Stephen F. Chenoweth, and Emma Hine, 329.

Parallel Evolution and Inheritance of Quantitative Traits. Dolph Schluter, Elizabeth A. Clifford, Maria Nemethy, and Jeffrey S. McKinnon, 809.

Parent-Offspring Conflict in the Evolution of Vertebrate Reproductive Mode. Bernard Crespi and Christina Semeniuk, 635.

Persistence and Fluctuation of Lateral Dimorphism in Fishes. Mifuyu Nakajima, Hiroyuki Matsuda, and Michio Hori, 692.

The Phylogenetic Mixed Model. Elizabeth A. Housworth, Emília P. Martins, and Michael Lynch, 84.

Phylogenetic Overdispersion in Floridian Oak Communities. J. Cavender-Bares, D. D. Ackerly, D. A. Baum, and F. A. Bazzaz, 823.

Pleiotropy and the Genomic Location of Sexually Selected Genes. Mark J. Fitzpatrick, 800.

Pollen Limitation and the Evolution of Androdioecy from Dioecy. Diana E. Wolf and Naoki Takebayashi, 122.

Predator Mixes and the Conspicuousness of Aposematic Signals. John A. Endler and Johanna Mappes, 532.

Priority versus Brute Force: When Should Males Begin Guarding Resources? Roger Härdling, Hanna Kokko, and Robert W. Elwood, 240.

A Putative Mechanism for Bog Patterning. M. Rietkerk, S. C. Dekker, M. J. Wassen, A. W. M. Verkroost, and M. F. P. Bierkens, 699.

Regional versus Climatic Effect on Taxon Richness in Angiosperms: Reply to Qian and Ricklefs. David J. Currie and Anthony P. Francis, 780.

Selection in Modular Organisms: Is Intraclonal Variation in Macroalgae Evolutionarily Important? Keyne Monro and Alistair G. B. Poore, 564.

Self-Similarity and the Species-Area Relationship. Roger D. Maddux, 616.

Self-Similarity, the Power Law Form of the Species-Area Relationship, and a Probability Rule: A Reply to Maddux. Annette Ostling, John Harte, Jessica L. Green, and Ann P. Kinzig, 627.

Similarity of Mammalian Body Size across the Taxonomic Hierarchy and across Space and Time. Felisa A. Smith, James H. Brown, John P. Haskell, S. Kathleen Lyons, John Alroy, Eric L. Charnov, Tamar Dayan, Brian J. Enquist, S. K. Morgan Ernest, Elizabeth A. Hadly, Kate E. Jones, Dawn M. Kaufman, Pablo A. Marquet, Brian A. Maurer, Karl J. Niklas, Warren P. Porter, Bruce Tiffney, and Michael R. Willig, 672.

Single-Generation Estimates of Individual Fitness as Proxies for Long-Term Genetic Contribution. Jon E. Brommer, Lars Gustafsson, Hannu Pietiäinen, and Juha Merilä, 505.

Spatial Dynamics of Specialist Seed Predators on Synchronized and Intermittent Seed Production of Host Plants. Akiko Satake and Ottar N. Bjørnstad, 591.

Spatial Flows and the Regulation of

Ecosystems. Michel Loreau and Robert D. Holt, 606.
Spatial Interactions and Resilience in Arid Ecosystems. Johan van de Koppel and Max Rietkerk, 113.
Spatial Scale and Temporal Component of Selection in Side-Blotched Lizards. Erik I. Svensson and Barry Sinervo, 726.
Sympatric Speciation by Sexual Selection: A Critical Reevaluation. G. Sander van Doorn, Ulf Dieckmann, and Franz J. Weissing, 709.
The Synergistic Effects of Stochasticity and Dispersal on Population Densities. Anthony R. Ives, Scott T. Woody, Erik V. Nordheim, Chris Nelson, and John H. Andrews, 375.
Taxon Richness and Climate in Angiosperms: Is There a Globally Consistent Relationship That Precludes Region Effects? Hong Qian and Robert E. Ricklefs, 773.
Testing Small Clutch Size Models with *Daphnia*. Meghan A. Guinnee, Stuart A. West, and Tom J. Little, 880.
Timing and Synchrony of Ovulation in Red Deer Constrained by Short Northern Summers. Rolf Langvatn, Atle Mysterud, Nils C. Stenseth, and Nigel G. Yoccoz, 763.
Trade-offs during the Development of Primary and Secondary Sexual Traits in a Horned Beetle. Armin P. Moczek and H. Frederik Nijhout, 184.
What Is Speciation and How Should We Study It? John J. Wiens, 914.
What Minimal Models Can Tell: A Reply to van Nes and Scheffer. Amit Huppert, Bernd Blasius, and Lewi Stone, 927.
What Minimal Models Cannot Tell: A Comment on "A Model of Phytoplankton Blooms". Egbert H. van Nes and Marten Scheffer, 924.
When Genes Go to Sleep: The Population Genetic Consequences of Seed Dormancy and Monocarpic Perenniality. Renaud Vitalis, Sylvain Glémin, and Isabelle Olivieri, 295.

Alphabetical Table of Keywords

abiotic factors, 754
activity, E88
adaptation, 417
adaptive divergence, 97
aerobic diving limit, 358
aerodynamics, 341
African Pygmies, 212
age structure, 295
AIC multimodel inference, 442
algal blooms, 924
Allee effect, 253
allometric scaling, 429
allometric scaling law, 69
alternative phenotypes, 888
ancestral state reconstruction, 654
androdioecy, 122
angiosperm, 773
Anolis, 26
antisymmetry, 692
aposematism, 532
apostatic selection, 532
Arabidopsis thaliana, 489
Arthropoda, 167
Aureobasidium pullulans, 375
autocorrelation, 312

Bamileke, 212
beetle horns, 184
behavioral ecology, 16
Bergmann's rule, 442
bet hedging, E112
biodiversity, 69
biogeography, 914
body mass, 192
body size, 429, 469
bottom-up, 927
bottom-up control, 924
branching growth, E24
breeding systems, 122
broadcast spawning, 735
brood hierarchy, 388
buoyancy, 358

canonical correspondence analysis, 312
Carnivora, 469
carrying capacity, 429
Cenozoic, 672
chaos, 857
character displacement, 1
chemostat, E126
chiasma frequency, 105
cholera, 901
climate, 780
clutch size, 880
coexistence, 518
Coleoptera, 1
colonization, 227
colony development, E24
common, 407
community, 69
community ecology, 787
community regulation, 754
comparative, 844
comparative analysis, 40
comparative method, 84
comparative methods, 654
competition, 726, 857
condition dependence, 800
conditional strategies, 888
conserved and convergent trait evolution, 823
constraint, E76
cost, 489
coupled oscillators, 857
coupling, E76
cross-feeding, E126
crustaceans, 240
crypsis, 532

damselfly, E88
Daphnia magna, 880
decision rules, 263
demographic buffering, 579
density dependence, 154, 277, 763
deuteromycete fungus, 375
development, 167
developmental plasticity, 868
developmental timing, 184
diet selection, 263
digestion, E88
dimorphism, 692
disease, E40
disease dynamics, 901
dispersal, 375, 407, 591
diversity, 480, 773
diversity and species richness gradients, E1
diving metabolic rate, 358
domain limits, E1
domestication, 105
doubly labeled water, 442
Drosophila melanogaster, 800
dynamic game theory, 154
dynamic optimization, 138

ecdysteroids, E76
ecological filtering, 823
ecosystems, 606
effective size, 295
egg mass, 726
egg size, 735, 880
elasticity, 579
energetics, 16
energy metabolism, E126
ENSO, 754
environmental heterogeneity, 548
environmental stochasticity, 579
epidemic model, 277
equilibrium theory, 227

ESS, 240
evolution, 122, 167, 341, 505, 518, 672, 800, 914
evolution of plasticity, E112
evolution of senescence, 55
evolutionary analysis, 97
evolutionary branching, 709
evolutionary processes, 417
evolutionary stability, 277
Ewondo, 212
experimental design, 97
experimental evolution, E126
extinction, 227
extrinsic forcing, 901

F statistics, 295
family richness, 773
fertilization efficiency, 735
Fisherian runaway, 709
fitness surface, 329
flight, 16, 341
food chains, 458
foraging behavior, 518
foraging constraints, 358
force platform, 844
fractal, 627
frequency dependence, 726
frequency-dependent disruptive selection, 709
frequency-dependent selection, 532, 692

general laws, 787
generalists, 97
genetic constraint, 809
genetic variance, 329
genetic variance-covariance matrix, 329
genetic-environmental relationship, 312
genetics, 809
genitalia, 184
genitalia variability, 1
geographic variation, 469
geometric constraints, E1
global, 780
gorgonian coral, E24
grazing optimization, 138
greater sage grouse, 154
growth, 167, E88
guarding criterion, 240
guppy, 55

habitat, 192
habitat selection, 312
handicap principle, 388
hatching asynchrony, 388
heritability, 672
history, 780
hormones, E76
hovering, 16
hummingbird, 16
hydrology, 699

IBD probabilities, 295
imaginal disk, 184
Impatiens capensis, 548
individual fitness, 505
individual-based model, 253
individual-based simulations, 709
induced defense, 888
intraclonal variation, 564
introduced species, 787
invasibility, 591
island biogeography, 227
island rule, 469
isolation by distance, 312

jelly coat, 735
jumping, 844
juvenile hormone, 184

kelp, 787

L1c1a1 haplogroup, 212
laterality, 692
leaf size, 654
lek mating system, 154
lek paradox, 329
Lesser Antilles, 227
life history, 505, E76
life-history evolution, 442, 735, 763
likelihood ratio, 97
likelihood statistics, 263
litter size, 880
lizard, 844
local adaptation, 253
longleaf pine, 787

macroalgae, 564
macroecology, 69, 192, 672
male-male competition, 709
marine, 480
mast seeding, 591
mate guarding, 240
mathematics, 616
mating dynamics, 240
mating skew, 154
Mbenzele, 212
Mediterranean-type climate, 654
meta-analysis, 40, 480, E64
metapopulation dynamics, 375, 407
microbial dynamics, 375
mid-domain effect, E1
minimal model, 924
minimal models, 927
mixed model, 84
model, 138, 606
model selection, 263
modular organisms, E24, 564
modularity, 868
monocarpy, 295
morphological evolution, 417
morphological integration, 868
mortality rate estimation, 55

mtDNA, 212
multiple causality, 924
mutation, E40
mutualism, 857

natural selection, 26, 505, 548
neutral model, 69
niche differentiation, 672
niche evolution, 253
niche-based model, 69
null models, E1, 823
nutrient cycle, 138
nutrient cycling, 606
nutrient limitation, 699

octocoral, E24
ombrotrophic, 699
omnivory, 458, 692
Onthophagus, 184
optimal body size, 469
overcompensation, 489
overwintering strategy, E112
oxygen reserves, 358

parallel evolution, 809
parasite, E40
parent-offspring conflict, 635
parental investment, 40
patchy resources, 375
path analysis, 548
pathogen, 489, E40
penguins, 358
phenology, 763
phenotypic evolution, 84
phenotypic manipulation, 548
phenotypic plasticity, 442, 888
phylogenetic analysis, 84
phylogenetic heritability, 84
phylogenetic structure of communities, 823
physiological response to predators, E88
phytoplankton blooms, 927
placentation, 635
plant defense, E64
plant phenology, 138
Platyrrhini, 417
pleiotropy, 800
Poecilia reticulata, 55
pollen limitation, 122
polymorphism, 726
polyspermy, 735
population divergence, 26
population dynamics, 429
population growth, 429
positive feedback, 113
power law, 616, 627
preadaptation, 105
predation, 55, 154, 532
predator satiation, 591
prey-predator system, 692
probability rule, 616
publication bias, E64

quantitative genetics, 84, 417, E40
Quercus, 823

R gene, 489
range size frequency distributions., E1
rare, 407
rate sensitivity, 505
recombination, 105
recruitment, 480
red-cockaded woodpecker, 787
redundancy analysis, 312
region effect, 773
regional, 780
reproductive isolation, 1, 914
reproductive mode, 635
reproductive strategies, 763
reproductive timing, 505
reproductive value, 277
resistance, 489
resource allocation, 880
resource allocation trade-off, 184
Rhopalosiphum padi, E112
risk spreading, E112
r_{max}, 429
rocky intertidal, 480

scaling, 616, 627
sclerophylly, 654
seasonality, 901
seed banks, 295
segmentation, 167
self-organization, E24, 699
self-similarity, 616, 627
senescence, 55, 763
sensitivity, 579
sensory drive, 26
sex allocation, 40
sex linkage, 800
sex ratio, 253
sexual conflict, 709
sexual selection, 40, 329, 341, 800
shade-induced plasticity, 548
signal detectability, 26
signaling, 388
Silene acaulis, 579
small rodent cycles, 442
solicitation, 388
solute transport, 699
Sorex shrews, 868
source-sink, 253
spatial dynamics, 591
spatial flows, 606
spatial model, 113
spatial patterns, 699
spatial scale, 113
specialists, 97
specialization, 518
speciation, 26, 914
species concepts, 914
species interactions, 823
species richness, 192, 773, 780
species-area relationship, 227, 616, 627
specific leaf area, 654
spring clear-water phase, 924
stable class distribution, 277
stickleback, 809
stochastic polyphenism, E112
stress, 868
succession, 480
superinfection, E40
synchrony, 591

tails, 341
takeovers, 240
temperature, 429
temporal heterogeneity, 518
temporary immunity, 901
theory, 122
threshold model, 888
top-down control, 924
trade-off, 277, E64, E88, 880
trade-off structure, 518
trade-offs, 97, 844
treelike networks, E24
Trilobita, 167
trophic cascade, 754
trophic interactions, 606
trophic level, 192, 458

units of selection, 564

variation, 868
vegetation collapse, 113
vegetation patterns, 113, 699
viviparity, 635

wing morphology, 16
wing pattern, E76
